SUCKED INTO THE VORTEX

③ Maximilian's Schell

The residents of Silver Lake Boulevard in Los Angeles have witnessed an increase in traffic since a golden, architect-designed black hole appeared recently. Created by Benjamin Ball and Gaston Nogues, a product designer for Frank Gehry, the shade structure cum art installation is the size of an apartment building, sparkles multicoloured light patterns throughout the day and rumbles with the ambient soundtrack, *Resonant Amplified Vortex Emitter*. Maximilian's Schell pays homage to the actor's sci-fi film, *The Black Hole*. www.ball-nogues.com.
